REACH Statement of Compliance

The regulation (EG) no. 1907/2006 (REACH Regulation) is an EU-Chemical Regulation that entered into force on 1st June 2007. REACH is the abbreviation of Registration, Evaluation, Authorisation and Restriction of Chemicals. The purpose is a strong protection level of human health and the environment by introducing restrictions on the use of hazardous substances and informing supply chains where they are used.

As a downstream user we are liable for information towards customers. We are not liable for registration of substances.

Components that you purchase from Zikodrive Motor Controllers (Round Bank Engineering Ltd) do not have to be registered. Chemical substances contained in our products that may possibly be subject to registration will be registered exclusively by our presuppliers.

We maintain contact with our suppliers to avoid SVHC materials being included in our products.

On the strength of our checks and experience no materials from the ECHA Candidate List with >0.1 mass percent are included in our products or packages. This is something we pay close attention to when designing new components and where necessary we contact suppliers direct if relevant documents are unclear or hard to find.

Should we become aware of any changes to this situation we will immediately take steps to notify our customers and minimise disruption to continuity of supply.

In case of further questions regarding the implementation of REACH Regulations in our company please do not hesitate to contact us.
